

Call for Participation SoCC 2016

ACM Symposium on Cloud Computing

5-7 October 2016, Santa Clara, California, USA

<http://acmsocc.github.io/2016/>

The annual ACM Symposium on Cloud Computing brings together researchers, developers, users, and practitioners interested in cloud computing. This year, we have a high quality program of papers and posters on topics spanning all layers of the cloud stack – from low-level kernel and filesystem optimizations; to cloud platform scheduling and isolation; to novel cloud applications and testing infrastructures.

The conference will be held in the heart of Silicon Valley, and will offer a great opportunity to meet top researchers, industry practitioners and students working on cloud computing, and hear about the latest cloud research and technology.

Registration is now open at <http://acmsocc.github.io/2016/registration.html>

We are proud to welcome three outstanding keynote speakers: Raj Yavatkar (VMware), Luiz Andre Barroso (Google), Ion Stoica (UC Berkeley). The full program is here:
